

## CONNECT TO NEO-FUGU

This is the first screen I access. This is the Neo-Fugu app login screen.

Access is secure for each user.

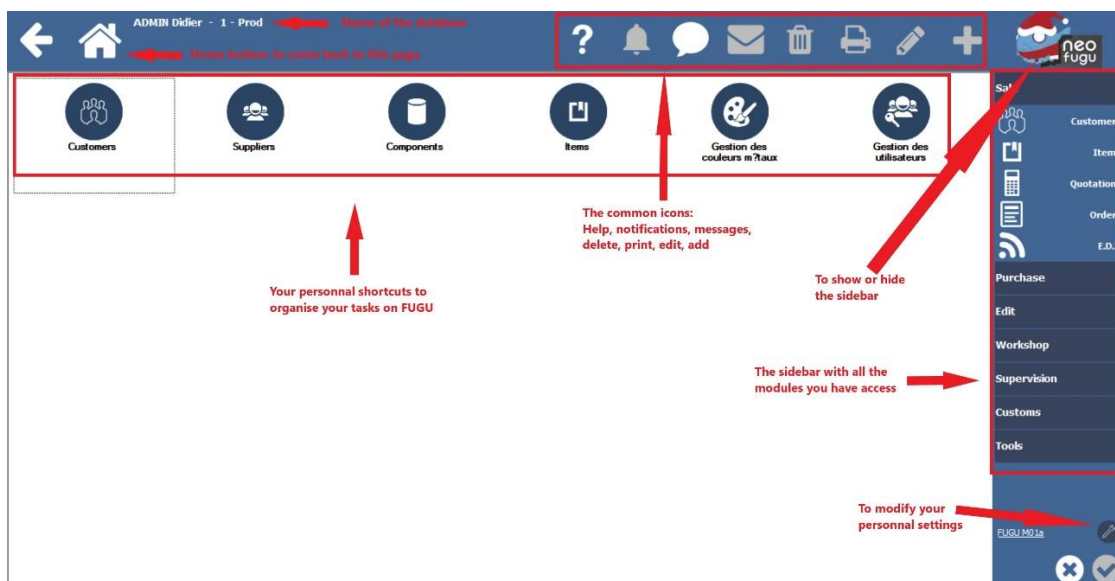

1. I enter my Username in the corresponding field.
2. I enter my Password in the corresponding field.
3. I finish by clicking on the Connection button to access Neo-Fugu.

Note: I can access the user list to directly select my user name. However, the password remains to be systematically completed.

## TIPS AND TRICKS

The Fugu menu at the top of the screen is frozen, just go to a tab in the side menu and use these icons.

The menu buttons can be enabled or disabled depending on the page I'm on: grayed out if they are inactive or white if they are active:

## Parameter button

This button is visible in the general information tab of the article for example, it allows you to:

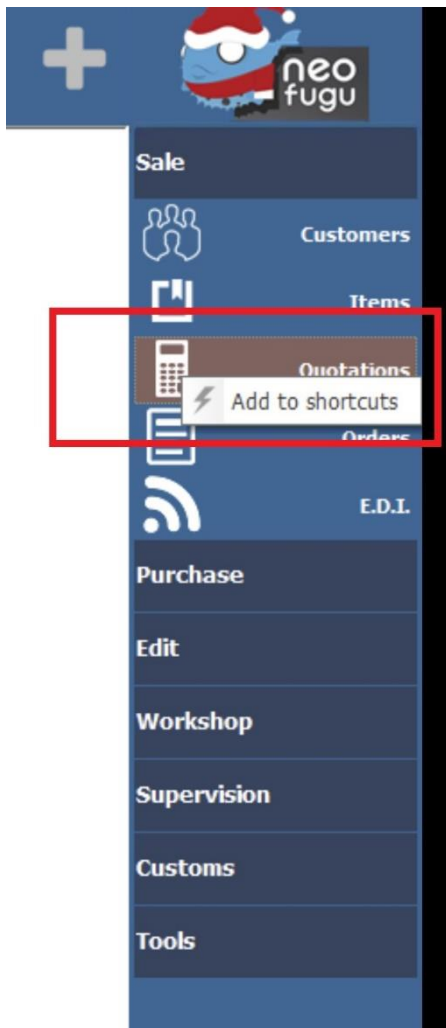

1. Add data
2. Delete
3. Click on the cross to cancel the current entry.

Marque	Archivé
MARQUE ATELI	<input type="checkbox"/>
TOUT VENANT	<input type="checkbox"/>

1  2  3 

I can add a shortcut to my home page. Just right-click on the menu you want and choose “add to shortcuts”

## PARAMÈTRE DU COMPTE UTILISATEUR

1. I click on the button at the bottom right 

This window is used to configure all the information relating to the user account.

I can modify the name, first name, login (name used for the connection) or create a password.

## 2. I modify my informations

ADMIN Didier - 1 - Prod
